# Anti-Vibration Solutions for Railways, Automotive and Other Industries

TECHNICAL DATA SHEET

Industry leader in manufacturing over hundreds of Rubbers and Thermoplastics based Moulded Anti-Vibrations, Mounts, Buffers, Dampers, Suspensions, Torsion Blocks, Silent Blocks, Bushes, Metal Bonded Parts and other polymeric engineering products for static and dynamic application for Railways and Roadways Sector.

#### **BRIEF DESCRIPTION**

Low FrictionThermoplastic Washer are almost identical to Spring Protection Pads or Happy Pads. Thees washers are used for high friction joints to minimize wear and tear apart from absorption of sudden shocks and damping for enhancement service life of connected steel elements. These pads also eliminate direct metal to metal contact reducing noise of the assembly. The most important property of this type of pads excellent coefficient of friction and low abrasion loss. The product is designed to perform in various weather conditions from dry to humid, hot to cold.

### **PRODUCT APPLICATION**

Thermoplastic Pads for Dynamic Application

### **WORKING LOAD RANGE**

Variable. This range is customisable.

### **WORKINGTEMPERATURE RANGE**

Works in ambient temperature between-40°C to 60°C. This range may be customised as per users' requirement.

## **MOSTLY USED IN**

Railways, Automobiles, Industrial Application
